You may begin searching for potential roommates as soon as you complete your housing application. We may not be able to accommodate all roommate requests, so please be prepared with a backup plan before you participate in online room selection. If HRC staff make your housing assignment, we will try to accommodate confirmed roommate requests, if space permits.

You can search for roommates through May 1, 2016.

Only UA students with a complete housing application can search for or select roommates.

To log in to your application, you will use your myBama username and password.
Once you have logged in, you will click on the Application header, as shown below.

Select the term for which you will be living on campus. Click **Save & Continue** as shown below.
We encourage you to use your full name as your screen name, which will make it easier for roommates you find outside of the Roommate Search to find you.

Be descriptive! You will be living with these roommates for several months, so include detailed information.

- What’s your major?
- Where are you from?
- How do you have fun?
- Do you want your room to be a hangout space or a study space?
- How often do you think cleaning should be done?
- How do you feel about overnight guests?
- Do you have any pet peeves?
- Will you share food or will everyone buy their own?

The more information you can provide, the better chance you have of finding roommates who share interests or can tolerate your habits.
Screen 10: Roommate Selection

Once a student has a room assignment for fall, the student will not be able to request a roommate or accept any roommate requests. The deadline to confirm roommates is 5 pm on May 1st, since only confirmed roommates can be assigned during room selection.

This roommate search tool is intended to provide an opportunity for students to connect with each other and to request each other as roommates. Confirmed roommates (both students requested each other) will be listed under the "Accepted" section below. Having a confirmed roommate does not guarantee a housing assignment with that person. Requesting/confirming multiple roommates does not guarantee that space will be available for all of your roommates in your room.

A student that is eligible for online room selection can assign a confirmed roommate to their room if space is available. For students that will be assigned by HRC staff, please note that roommate requests will be granted if space is available, but is not guaranteed.

Suggested Roommates

The Roommate Search will allow you several ways to find potential roommates.

Search Options
Search By Details: You may search using a student’s name, email or something in their description, like the word “sports” or “engineering.”

Note: Setting your screen name as your full name may help others locate you more easily.

Search by Profile Questions: Allows you to prioritize your preferences. For instance, if one question is critical to you (sleep habits, smoking habits, honors housing preference), you may search by that variable to find all matches who share your preferences in that area.

Browse Matching Roommates: The Roommate Search feature will show you potential roommates who have preferences close to yours.
When you find a roommate who matches your search, you can either Request to be his/her roommate, or View Profile to find out more information about this roommate match.

When you are ready to make a request, you will click Request under his/her screen name. You will be prompted with the message to confirm that you want to request this roommate.
Once you have requested the roommate, you will see this person in your Request Roommates section. You may cancel a request before it has been mutually confirmed by clicking Cancel Request.

When the other student has responded to your request, you will see the changes in your account. If the student accepted your request, you will automatically see that student under Accepted Roommates.

**Responding to a Request**

If you have received a roommate request, you will see a notification by your name at the top of the screen.

You will need to select the term for which you are applying in order to see your requests.
Under Requested Roommates, you will see any pending roommate requests. You may view the student’s profile, accept the request or deny the request. It is completely up to you.

When you are ready to accept a request, you will click **Accept Request** under his/her screen name. You will be prompted with the message to confirm that you want to accept this roommate.

To become confirmed roommates, one student will send the roommate request, and the person receiving the roommate request will log in and accept the request. This will make the roommates mutually confirmed.

Once the roommate request has been mutually confirmed, both students will see the other student in the Accepted Roommates section. Be careful about accepting roommates, as your accepted roommates may pull you into a space during online room selection. You may have up to three confirmed roommate requests.

If you are able to participate in online room selection, you will be able to assign yourself to a space and then, space permitting, assign your confirmed roommates to vacant space(s) within your room or suite. If your confirmed roommate is able to select a room before you, that person can assign you to a space. If HRC staff make your housing assignment, we will assigned confirmed roommates together, space permitting.
